How to Use this Guide

Before learning to solve the Rubik’s Master, you should be proficient at solving the Rubik’s Cube (original 3x3). Throughout this guide please reference the Rubik’s Cube (3x3) guide.

Once you group the centers and pair the edges, you will be solving the Rubik’s Master like the Rubik’s Cube using the layered method. After you learn this method, you can add speed cubing moves when you are ready.

Throughout the guide you will see this symbol to indicate helpful tips. Take the time to read the tips closely.

The gray areas on the Rubik’s Master mean that at the stage you are working on, the color of the gray pieces doesn’t matter.

Tips for Success

Mindset is critical - learning to solve the Rubik’s Master is difficult but if you persevere, you CAN solve the Rubik’s Master.

Keep the Rubik’s Master on a table or use a mat like the one on www.YouCanDoTheCube.com to maintain the same front face for an entire algorithm (sequence of moves).

Think of the algorithms as moving a piece out of the way, setting up its correct position, and then moving the piece into place.

Solve one step at a time by re-scrambling your Rubik’s Master and practicing multiple times before moving on to the next step.

Use this guide along with You CAN Do the Rubik’s Cube’s corresponding resources such as videos, solving checklist, songs and chants.

Get to Know Your Rubik’s Master

Like the Rubik’s Cube, the Rubik’s Master is made up of edge, corner, and center pieces.

Both puzzles have 8 corner pieces, however the Rubik’s Master has 24 center pieces instead of 6, and 24 edge pieces instead of 12.

Unlike the Rubik’s Cube, there is not a fixed center piece to indicate the color of each face when the Rubik’s Master is solved.

The color layout is found through observations of the corner pieces, or by knowing that the Rubik’s Master follows a certain color layout:

- WHITE
- RED
- BLUE
- ORANGE
- YELLOW
- GREEN

Notice the order of the colors, as shown in the image below:

When WHITE is on top, RED is to the left of BLUE, and...

GREEN is left of RED
ORANGE is right of BLUE
YELLOW is on bottom

Very Important:

- Each move is a ¼ turn.
- An ALGORITHM is a sequence of moves that you need to do in a specific order.
- When following the algorithms in this guide, it is important to maintain the FRONT face of your Rubik’s Master so it remains the FRONT through all of the turns.
## GET TO KNOW YOUR RUBIK’S MASTER

### FACE KEY

You probably know these faces.

- **U** = UP FACE
- **D** = DOWN FACE
- **L** = LEFT FACE
- **R** = RIGHT FACE
- **F** = FRONT FACE
- **B** = BACK FACE

### ALGORITHM KEY

Face turns:

- **U** = UP
- **U’** = UP
- **D** = DOWN
- **D’** = DOWN
- **L** = LEFT
- **L’** = LEFT
- **R** = RIGHT
- **R’** = RIGHT
- **F** = FRONT
- **F’** = FRONT
- **B** = BACK
- **B’** = BACK

### SLICE KEY

Here is how we refer to the inside “slices”.

- **u** = INSIDE UP
- **d** = INSIDE DOWN
- **l** = INSIDE LEFT
- **r** = INSIDE RIGHT
- **f** = INSIDE FRONT
- **b** = INSIDE BACK

### ALGORITHM KEY

Slice turns:

- **u’** = INSIDE UP
- **d’** = INSIDE DOWN
- **l’** = INSIDE LEFT
- **r’** = INSIDE RIGHT
- **f’** = INSIDE FRONT
- **b’** = INSIDE BACK

### FACE AND SLICE KEY

If there are two letters then turn the face and the slice as one piece.

- **Uu** = UP FACE & INSIDE UP
- **Dd** = DOWN FACE & INSIDE DOWN
- **Rr** = RIGHT FACE & INSIDE RIGHT

### ALGORITHM KEY

- **Uu’** = UP FACE & INSIDE UP
- **D’d’** = DOWN FACE & INSIDE DOWN
- **R’r’** = RIGHT FACE & INSIDE RIGHT

- **F2** = INSIDE FRONT
- **F’2** = INSIDE FRONT
- **F’** = INSIDE FRONT

- **If there is a 2 after the letter, then make that turn twice.**

- **A turn is clockwise when looking at that face directly. A letter with an apostrophe (’) after it means to make an inverse or counterclockwise turn of the face.**
**STEP ONE: SOLVE THE CENTERS**

**HOLDING YOUR RUBIK’S MASTER**
Hold the Rubik’s Master so the WHITE logo tile is on the UP face.

**IMPORTANT INFORMATION**
- There are 24 center pieces on the Rubik’s Master that need to be grouped in sets of 4. Then there will be 6 centers like on a Rubik’s Cube.
- Start by solving the WHITE center.

**Action 1** Locate another WHITE center tile that is not on the UP face.

**Action 2**
If your other WHITE tile is NOT on the DOWN face:
- Hold your Rubik’s Master so that the other WHITE tile is on the FRONT face.
- Turn the FRONT face (F) until the tile is in the lower right of the 4 center tiles.

If your other WHITE tile IS on the DOWN face:
- Hold your Rubik’s Master so that the other WHITE tile is on the FRONT face.
- Turn the DOWN face (D) until the other WHITE tile is in the lower right of the 4 center tiles.

**Action 3**
Turn the UP face (U) until there is a non-WHITE tile in the upper left corner of the 4 center tiles.

**Action 4**
If your other WHITE tile is on the FRONT face, follow this algorithm:

\[ Rr \ U \ R'r' \]

If your other WHITE tile is on the DOWN face, follow this algorithm:

\[ Rr2 \ U \ Rr2 \]

**Action 5** Repeat Actions 1-4 until all 4 center tiles are WHITE.

**Action 6**
Continue solving the center pieces for all 6 faces. Follow the actions on pages 4 & 5, replacing WHITE in each step with the next color.

Solve the colors in this order:

1. WHITE
2. YELLOW
3. RED
4. GREEN
5. ORANGE
6. BLUE

Remember - when YELLOW is the UP face, GREEN is to the right of RED.

When solving the other centers, you must remember the orientation of the colors.
**STEP TWO:**

**PAIR THE EDGES**

There are 24 edge pieces on the Rubik’s Master that need to be paired so you have 12 edges like a Rubik’s Cube. The edges do not need to match the centers yet.

---

**Action 1**

Find the two orange and white edge pieces. Use outside turns to get the edge pieces on the left and right of the FRONT face. The color of the center doesn’t matter.

---

**Action 2**

If the edges are not directly across from each other, follow this sequence to line them up.

- R
- F’
- U
- F

Go to Action 2

---

**Action 3**

Once the edges are across from each other, follow this sequence to pair them.

- Dd
- R
- F’
- U
- R’
- F
- D’d’

The phrase above may help you remember the algorithm.

---

**Action 4**

Repeat Actions 1-3 until all 24 edge pieces are paired.

---

**Hold your Rubik’s Master to match one of these; you may need to turn your Rubik’s Master over.**

<table>
<thead>
<tr>
<th>CUBE ONE</th>
<th>CUBE TWO</th>
<th>CUBE THREE</th>
<th>CUBE FOUR</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="front_face.png" alt="" /></td>
<td><img src="front_face.png" alt="" /></td>
<td><img src="front_face.png" alt="" /></td>
<td><img src="front_face.png" alt="" /></td>
</tr>
</tbody>
</table>

**Go to Action 2**

**Skip to Action 3**
STEP THREE:  
**SOLVE THE RUBIK’S MASTER LIKE THE RUBIK’S CUBE**

- After grouping the centers and pairing the edges, the Rubik’s Master can now be solved like the Rubik’s Cube.

- There may be two times when solving the Rubik’s Master like a Rubik’s Cube that additional steps are needed that are not covered in the Rubik’s Cube Solution Guide. These two cases are referred to as **parities**. The parity fixes can be found on pages 11 (Make the yellow cross) and 13 (Position the final yellow edges) of this guide.

**Action 1**  
Solve the White Cross

**Action 2**  
Solve the White Corners

**SOLVING THE WHITE CORNERS**  
If you can’t solve the White Corners, you may have the Centers in the wrong color order. You’ll need to go back and resolve the Centers and Edges.

**Action 3**  
Solve the Middle Layer  
keeping the paired edges together as one piece. This picture shows the Rubik’s Master with the White face down.

**A SOLUTION GUIDE FOR THE RUBIK’S CUBE (3X3) CAN BE FOUND AT:**

www.YouCanDoTheCube.com

**WHEN SOLVING THE RUBIK’S MASTER LIKE A RUBIK’S CUBE, TO ONLY TURN THE OUTSIDE FACES.**
STEP THREE: 
SOLVE THE RUBIK’S MASTER LIKE THE RUBIK’S CUBE

Action 4: Make the Yellow Cross

If you have 1 or 3 Yellow edge pairs on the UP face, follow the algorithm for fixing the parity on page 11.

If you have 0 or 2 Yellow edge pairs on the UP face, follow the Rubik’s Cube Solution Guide.

Action 5: Make the UP face all Yellow

Action 6: Position the Yellow Corners

Fixing the Parity
If you have 1 or 3 Yellow edge pairs on the UP face, hold your Rubik’s Master to match one of these images and then follow this algorithm:

Once you have fixed the parity go to Action 5 on page 10.

Notice that the LEFT and RIGHT are slice turns. FRONT, BACK, and UP are face turns.
**STEP THREE:**
**SOLVE THE RUBIK’S MASTER LIKE THE RUBIK’S CUBE**

**Action 7** **Position the final Yellow Edges**

This is where the second parity may occur and you need to use algorithms that are not in the Rubik’s Cube Solution Guide.

- If there are **NO YELLOW EDGE pairs positioned correctly:**
  - Follow the algorithm in the *Rubik’s Cube Solution Guide*.
  - You will end up with 1 or 2 edge pairs positioned correctly.
  - If one Yellow edge pair is now placed correctly, follow the algorithm in the *Rubik’s Cube Solution Guide* for positioning Yellow Edges.
  - If two Yellow edge pairs are now placed correctly, follow the directions on the next page.

- If there is **ONE YELLOW EDGE PAIR in the correct position:**
  - Follow the algorithm in the *Rubik’s Cube Solution Guide* for positioning Yellow Edges.

- If the **TWO CORRECTLY PLACED EDGE PAIRS are opposite each other:**
  - Hold the Rubik’s Master so the correctly placed edge pairs are on the LEFT and RIGHT faces.
  - **Follow the algorithm below to fix the parity.**

- If the **TWO CORRECTLY PLACED EDGE PAIRS are adjacent (next to each other):**
  - Hold the Rubik’s Master so the correctly placed edge pairs are on the LEFT and BACK faces.
  - **Follow the algorithm below to fix the parity.**
  - Finally, follow the algorithm in the *Rubik’s Cube Solution Guide* for positioning Yellow edges.

---

**Notice all the RIGHT turns are slice turns.**
The words are there to help you remember the algorithm.
